SUSTAINING THROUGH PROSPERITY

WHEF ANNUAL SESSION 2013 @ BANGKOK

Globally spread Hindus can ensure that Hindu producers in other parts of the world can get access to worldwide market. Similar cooperation can be envisaged in area of capital enabling availability of appropriately priced capital. Equally truly there has to be matching of the technological Hindu wizards, with those who can convert the technology into business by enriching it with funds and extending it with markets.

Cooperation at these three levels can give the Hindu wealth creators an edge in global market space to be able to create wealth and prosperity for the benefit of Hindu community world wide.

But above all there has to be policy environment that does not create obstacles for Hindu wealth creators from pursuing legitimate business goals in any part of world.

The World Hindu Economic Forum seeks to enable cooperation and cooperation among Hindus to further all these objectives – market access, credit availability, technological prowess and last but not the least conducive policy environment.

The Hindu GDP outside Bharat is almost a large as Hindu GDP within Bharat and if Hindus across the world collaborate, they can create unprecedented prosperity not just for Bharat but also for Hindus across the world, and thus enable a prosperous Hindu community spread over various nations and continents.
